The River Otter Ecology Project needs help from nature-lovers!

As part of a long-term ecological study of River Otters (not sea otters) in the greater Bay Area, we are documenting sightings. You can participate!

If you see River Otters, please share your observations.
You can input them at www.riverotterecology.org, (click the Otter Spotter icon), or email us at megan@riverotterecology.org with date, time, location, number of otters seen, behavior and photos/videos. We use photos/videos only with your permission and credit. Join us on Facebook to learn more!
