

# The River Otter Ecology Project needs help from nature-lovers!

As part of a long-term ecological study of River Otters (not sea otters) in the greater Bay Area, we are documenting sightings. You can participate!

**If you see River Otters, please share your observations.**  
Input them at our easy dropdown form on [www.riverotterecology.org](http://www.riverotterecology.org). Try to get a photo! We use photos only with your permission and credit.
